

# Enviva Partners, LP deal summary

---

In April 2019, the Tortoise energy team closed a private investment in public equity (PIPE) financing in the Tortoise Essential Assets Income Term Fund. Tortoise helped Enviva Partners (EVA) finance asset acquisitions through the equity financing. EVA is a publicly traded master limited partnership that aggregates natural wood fiber and processes it into wood pellets used by global power generators. Wood pellets are used as a substitute for coal in both dedicated and co-fired power generation and combined heat and power plants. Using wood biomass in power generation is a low-cost option to lower emissions to meet global climate change goals, as the emissions of pellet based electricity is ~75% lower than that of coal-based electricity. EVA sells a significant majority of its wood pellets through long-term, take-or-pay agreements with creditworthy customers in Europe and Asia.
